EDUCATION

Harvard University

Bachelor of Arts in Computer Science

Class of 2020, Graduated 2021

Cambridge, MA

EXPERIENCE

Senior Backend Engineer

September 2024 – Present

Ribbiot

Remote

- Architected backend services, APIs, and data models for an industrial operations platform, supporting scalable workflows for enterprise clients.
- Optimized CI/CD pipelines in collaboration with DevOps, reducing deployment failures by 35% and speeding delivery cycles.
- Designed modular job and task management workflows, enabling rapid client-specific customization without code changes.
- **Tech:** AWS, Serverless, Typescript, GraphQL, GitHub Actions, CircleCI, DataDog, SQL, Docker, Supabase, postgres, React

Software Engineer

September 2022 – September 2024

Notable

Remote

- Automated healthcare administration tasks using Python computer vision, reducing manual processing by 60%.
- Led a team of 5 contractors, improving iteration speed and task reliability across automation projects.
- Directed decisions on code quality and architectural patterns, resulting in 40% fewer review corrections.
- Built integrations for web payor portals using Python, Typescript, and GCP, ensuring HIPAA-compliant data ingestion.
- **Tech:** GCP, Typescript, Selenium, Python, Jenkins, Concourse, SQL, Docker, Jest

Software Engineer

January 2022 – August 2022

Zagaran Inc

Boston, MA

- Refactored Django codebase, improving scalability and maintainability across multiple applications.
- Optimized database ingestion and querying, achieving 3x performance improvement.
- **Tech:** Django, Python3, Numpy, Postgres, Pandas, Angular, React, Node.js, AWS

Software Engineer in Test

March 2021 – January 2022

EzeSoft, SS&C

Remote / Boston, MA

- Developed a Kubernetes-based performance testing framework, providing actionable insights to stakeholders.
- Introduced a data architecture framework to support test-driven development, improving test coverage by 50%.
- Owned integration and unit test development across services, ensuring higher code reliability.
- **Tech:** C#, Node.js, Jest, Jenkins, Jira, Kubernetes, C++, Tableau, AWS

Data Scientist

September 2018 – September 2019

Activision

Boulder, CO

- Performed sentiment analysis on 600k+ users, informing product decisions and marketing strategies.
- Built ETL pipelines processing 18M+ posts with Python, Kafka, and AWS, reducing data latency by 70%.
- Developed internal analytics tools using React and Flask, improving data exploration efficiency.
- Implemented multithreaded workers using Celery and Redis to process high-volume datasets reliably.
- **Tech:** Python, Kafka, React, Celery, Redis, Spark, Kubernetes, Docker, AWS, MongoDB, SQL, Snowflake

TECHNICAL SKILLS

Languages: Typescript, Python, C/C++, Java, SQL, JavaScript, Node.js, React, Bash

Databases: Postgres, MSSQL, MySQL, Redshift, MongoDB, Elasticsearch

Architecture: Microservices, Serverless systems, Event-driven Workflows, CRUD APIs

Libraries: Flask, Django, Prisma ORM, Jest, PyTest, GraphQL, Selenium, Pandas, NumPy, scipy,

Developer Tools: Git, Docker, CircleCI, Kubernetes, AWS, GCP, S3, IAM, Jenkins, , claude code, opencode, roo, cline, QWEN, Codex

Interests: Backend systems design, cloud architecture, data engineering, AR/VR hobby projects, lifting, running, and yoga, sourdough baking
